

PRODUCT

Panda IB System

Affiliate & IB Management System
For Modern Brokerages

Panda
TRADING SYSTEMS

One Connected Environment

for managing IBs, affiliates, commissions, and referrals.

Built to Scale Partner-Driven Brokerage Growth

As partner networks grow, managing referrals, commission structures, and multiple IB levels becomes increasingly complex. Panda IB System simplifies this by giving brokers greater control and visibility across their entire partner network.

From commission structures and referral attribution to real-time partner tracking and reporting, Panda IB System helps brokers centralize partner operations while giving IBs full visibility into referred clients, trading activity, and commission performance through the IB Portal

Multi-Level

IB & affiliate structures

Real-Time

commission & client tracking

Integrated

CRM & brokerage connectivity

> Designed for scalability, operational transparency, and flexible commission management, Panda IB System helps brokerages manage growing partner networks without disconnected systems or manual reconciliation processes.

About Panda Trading Systems

Nearly Two Decades of Brokerage Technology Innovation

Since 2006, Panda Trading Systems has been building brokerage technology designed specifically for forex and CFD brokers. From a startup in Haifa to a global brokerage technology provider, PandaTS has continuously evolved its infrastructure to support regulated brokers operating in highly competitive environments.

Today, PandaTS provides a complete brokerage ecosystem that includes CRM infrastructure, Client Area, WebTrader, mobile applications, trading server infrastructure, social trading, IB management, risk management tools, and operational automation systems.

Built around scalability, automation, and operational efficiency, PandaTS solutions help brokers centralize operations, improve client experience, and manage brokerage activities from one connected environment.

2019 Launch of COOMA Social Trading ecosystem

2014 Launch of Panda FX Trading System 2.0

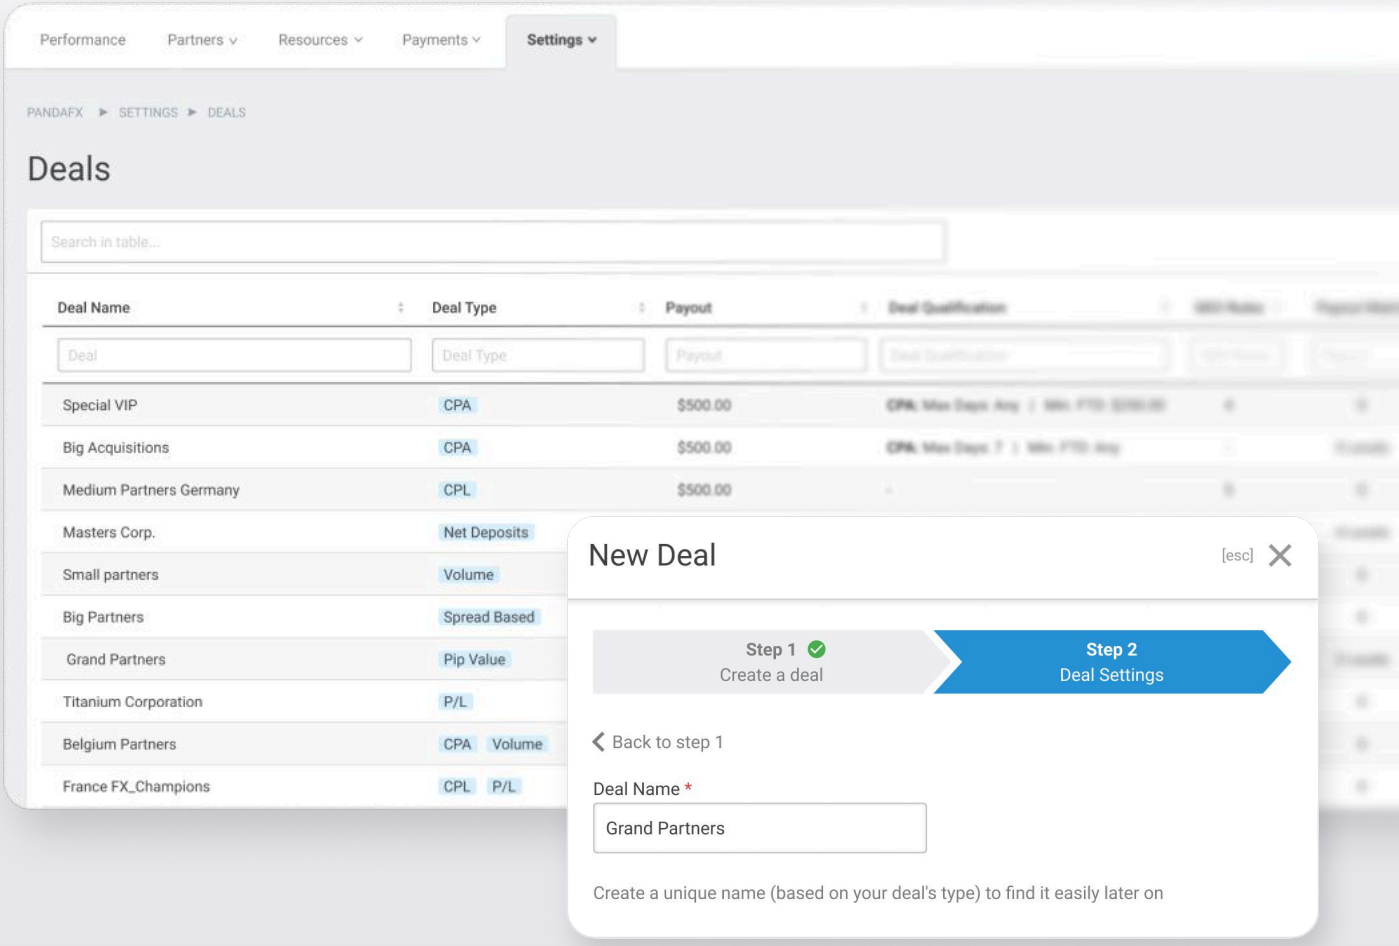

2006 Panda Trading Systems founded in Haifa, Israel

Flexible Partner Models, Defined by the Broker

Not every IB or affiliate relationship works the same way. Panda IB System allows brokers to define partner agreements according to their acquisition strategy and commercial requirements.

Create different deal structures, set qualification criteria, define payouts, and apply the appropriate commission model to each partner or partner group.

> From CPA and CPL to trading-volume, spread-based, P&L, pip-value, and deposit-based models, brokers can adapt partner terms to different markets and acquisition strategies.

Flexible Deal Types

Set flexible commission models for each affiliate, including CPA, CPC, CPL, and more.

Promo Materials

Give partners easy access to banners, landing pages, referral links, and other marketing materials.

Main Features

Client Activity Visibility

IBs can monitor referred client trading activity and operational performance.

Partner Reporting

Operational dashboards for monitoring partner activity and performance.

Multi-Level IB Support

Supports custom payout structures with up to 5 partner levels.

Standalone Deployment

The IB System can operate independently or alongside Panda CRM infrastructure.

Secure Communication Infrastructure

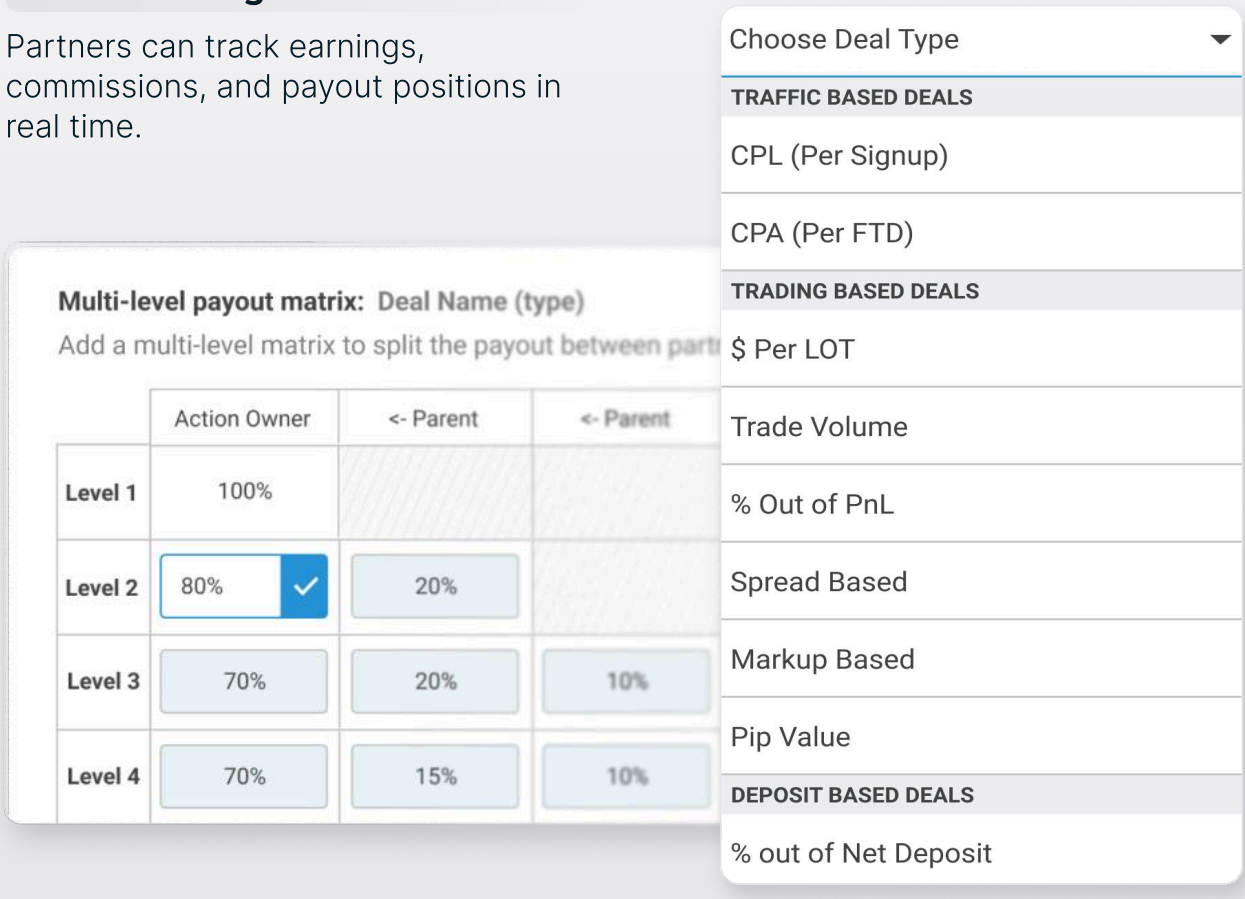

Advanced encryption and secure operational communication channels.

Commission Breakdown Logic

Detailed visibility into CPA, revenue-share, and hybrid commission structures.

Real-Time Commission Monitoring

Partners can track earnings, commissions, and payout positions in real time.

Operational Advantages

Shared Client & Partner Data Model

Partner-side and broker-side data operate from the same connected infrastructure.

Real-Time Performance Analytics

Analyze partner performance, trading activity, retention, and lifetime value directly inside the operational environment.

Faster Commission Resolution

Reduce commission disputes through unified operational visibility.

Reduced Manual Operations

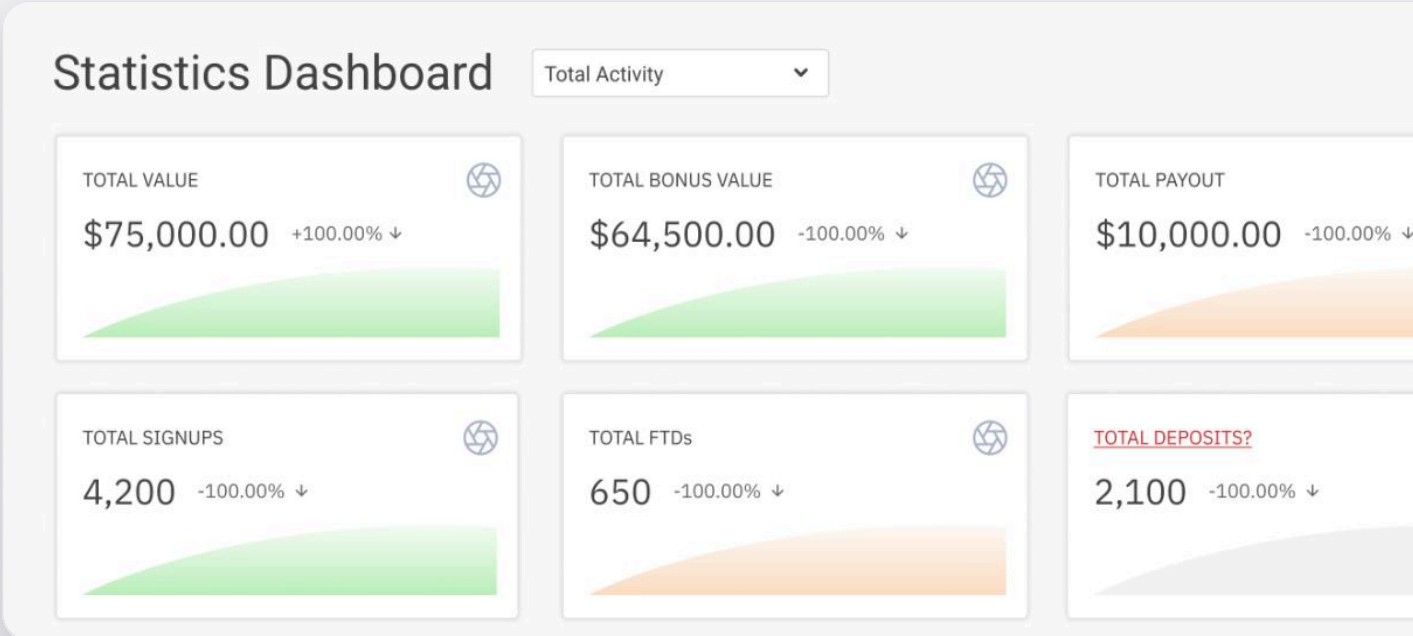

Eliminate spreadsheet reconciliation and disconnected reporting processes.

Integrated Compliance Workflows

Partner onboarding can operate through the same KYC and operational infrastructure used for brokerage clients.

Scalable Partner Infrastructure

Designed for brokerages expanding across multiple regions and acquisition channels.

Frequently Asked Questions

DOES THE IB SYSTEM SUPPORT MULTI-LEVEL IB STRUCTURES?

Yes. It supports custom payout formulas and multi-level partner structures with up to 5 levels of partners in the network.

IS THE IB SYSTEM SECURE & INDUSTRY-COMPLIANT?

Yes. Security is a priority. The IB System and IB Portal feature advanced encryption, secure communication channels, and operational data-protection infrastructure.

IS IT AVAILABLE AS A STANDALONE PRODUCT?

Yes. The Panda IB System can be deployed independently or integrated alongside Panda CRM and other brokerage infrastructure products.

HOW ARE COMMISSIONS CALCULATED WITHIN THE IB SYSTEM?

The system provides detailed commission calculation visibility and supports multiple commission models including CPA, revenue share, hybrid structures, and broker-defined payout logic.

Explore Panda Ecosystem

One Platform. Every Solution.

Beyond IB System, Panda Trading Systems provides the surrounding infrastructure brokers need to operate efficiently — including CRM systems, WebTrader environments, social trading infrastructure, and brokerage automation tools.

Additional Products

Panda Trader
Dedicated cloud-based trading server infrastructure built for brokerage operations.

Panda CRM
Brokerage-native CRM infrastructure covering onboarding, compliance, retention, funding, reporting, and operational automation.

Panda WebTrader
Fully branded browser-based trading platform designed for modern multi-device trading experiences.

Mobile Applications
Native iOS and Android brokerage applications connected directly to trading infrastructure.

COOMA Social Trading
Social trading ecosystem allowing brokers to offer copy trading and community-based investing experiences.

Panda Quote Engine (PQE)
High-performance pricing infrastructure for liquidity aggregation, spread management, and real-time market data delivery.

PAMM / MAM Solutions
Multi-account investment management infrastructure supporting professional money managers and allocation models.

Meta Dealing & Risk Plugins
Advanced brokerage plugins designed to optimize operational workflows, risk management, and MT4/MT5 environments.

Operate your brokerage from one connected ecosystem built specifically for the operational reality of forex and CFD brokers.
