TRADING SYSTEMS

Panda Mobile Apps

Fully branded iOS and Android trading applications designed for brokers that want to deliver seamless mobile trading experiences across global markets.

About Panda Trading Systems

Nearly Two Decades of Brokerage Technology Innovation

Since 2006, Panda Trading Systems has been building brokerage technology designed specifically for forex and CFD brokers. From a startup in Haifa to a global brokerage technology provider, PandaTS has continuously evolved its infrastructure to support regulated brokers operating in highly competitive environments.

Today, PandaTS provides a complete brokerage ecosystem that includes CRM infrastructure, Client Area, WebTrader, mobile applications, trading server infrastructure, social trading, IB management, risk management tools, and operational automation systems.

Built around scalability, automation, and operational efficiency, PandaTS solutions help brokers centralize operations, improve client experience, and manage brokerage activities from one connected environment.

What is Panda Mobile App

Panda Mobile App is a fully branded native trading application designed to give brokers a seamless mobile trading environment connected directly to their brokerage infrastructure.

Built for modern traders who expect instant access to financial markets from anywhere, the Panda Mobile App combines trading functionality, account management, and real-time market access into one intuitive mobile experience.

The application supports:

MT4/MT5 Frontend Connectivity

Real-time market monitoring and trade execution

Multi-asset CFD trading

Account management and funding access

Live positions, balance, and order monitoring

Push notifications and trading alerts

Secure authentication and user management

> Designed for performance, stability, and flexibility, the Panda Mobile App allows brokers to offer clients a professional trading experience fully aligned with their brand identity and operational workflows.

Unlike generic white-label mobile solutions, Panda Mobile App is built specifically around brokerage operational requirements, client retention, and long-term scalability.

Main Features

65% of stock investors trade through mobile apps. Panda Mobile App is a fully branded iOS and Android solution integrated with your brokerage.

Fully Branded Application

Customize your application with logos, colors, and interface branding.

Native iOS & Android Apps

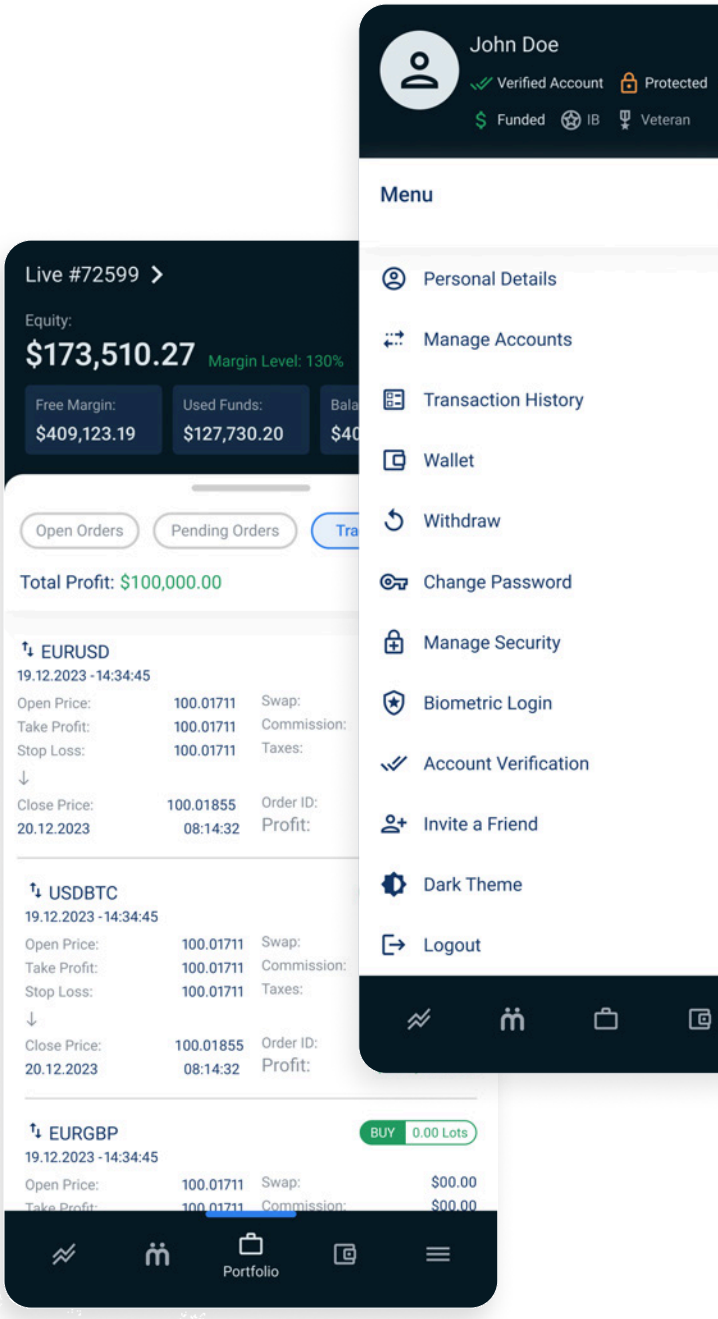

Native applications for iOS and Android operating systems.

Real-Time Trading

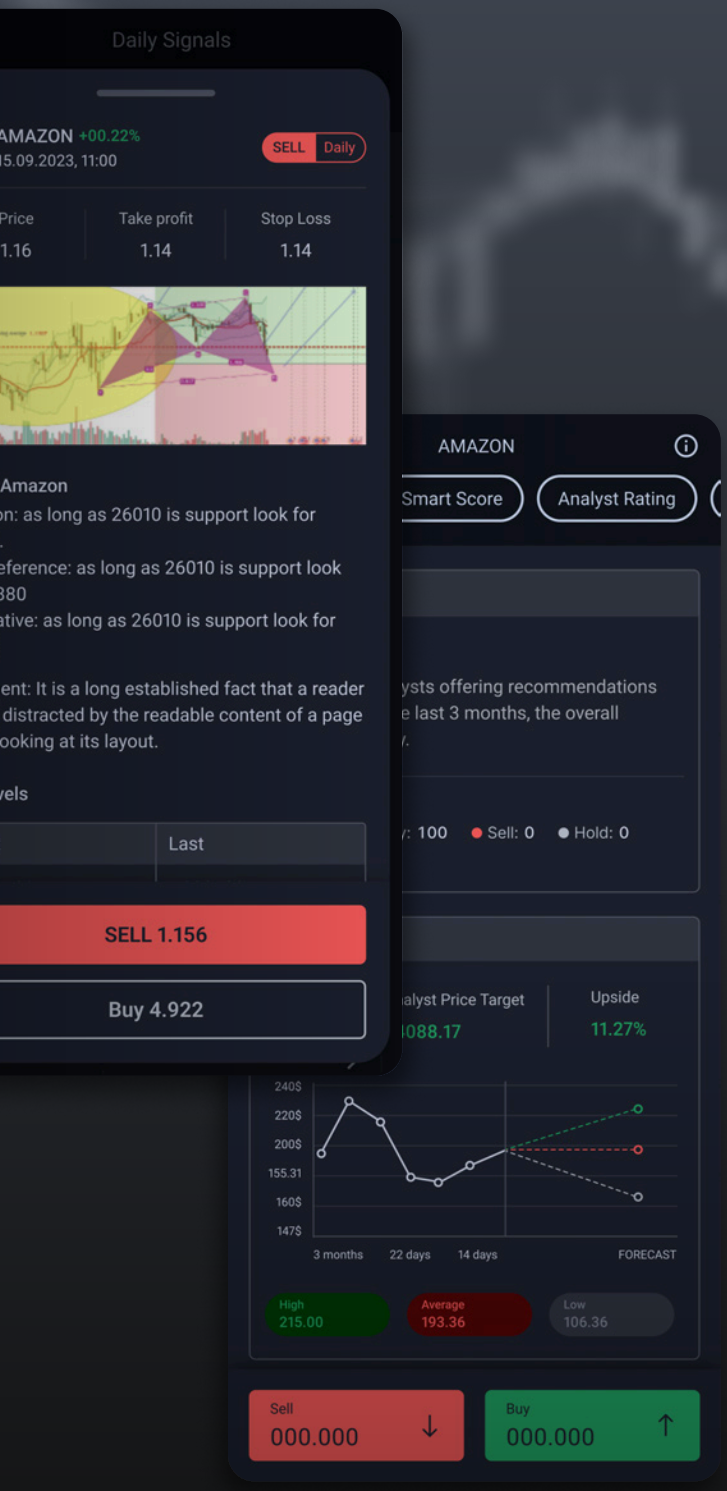

Place orders, monitor positions, and track market prices.

Account Management

Manage balances, orders, positions, deposits, and withdrawals.

Main Features

Advanced Charting

Access technical indicators, drawing tools, and interactive price charts.

Secure Authentication

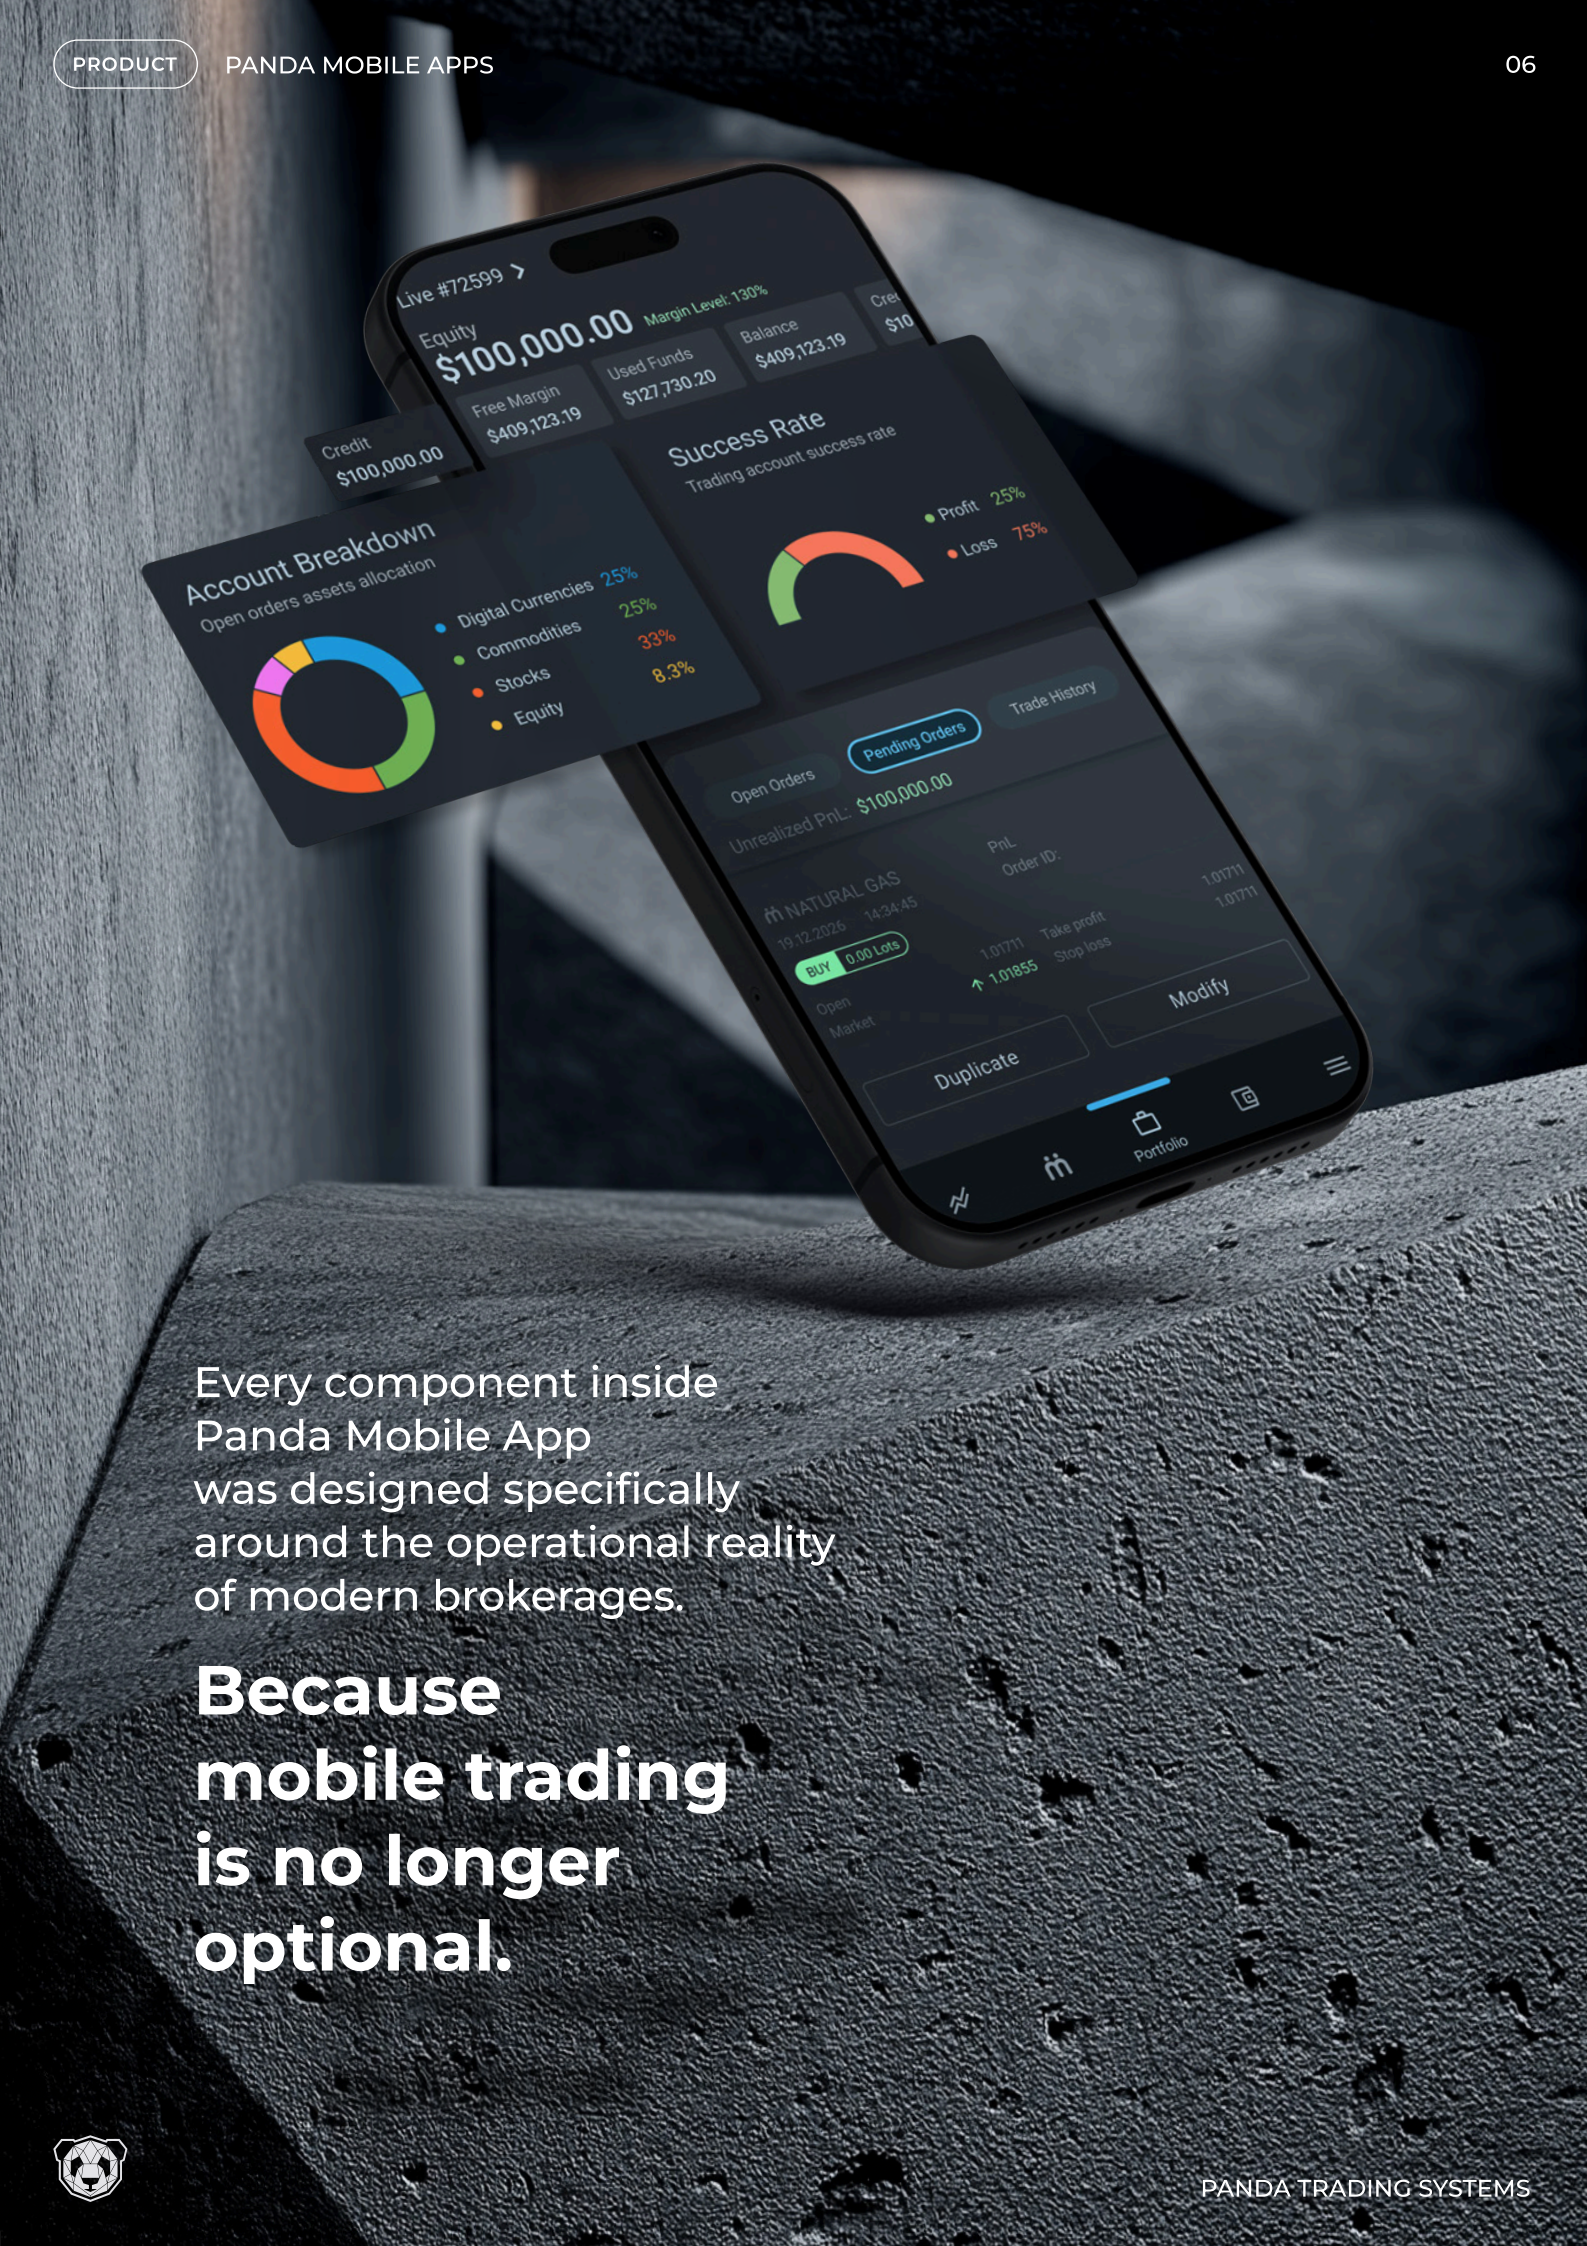

Support secure login, encrypted communication, and multi-factor authentication.

Push Notifications

Receive market alerts, account updates, and operational notifications.

Multi-Server Compatibility

Compatible with MT4, MT5, and Panda Trader servers.

Every component inside Panda Mobile App was designed specifically around the operational reality of modern brokerages.

Because mobile trading is no longer optional.

How It Works:
The Role of Panda Mobile App in Your Stack

Panda Mobile App serves as the mobile trading layer inside your brokerage infrastructure, connecting traders directly to your trading environment while maintaining full synchronization with your operational systems.

The application integrates directly with supported trading servers and brokerage infrastructure, allowing brokers to deliver a unified trading experience across desktop, web, and mobile channels.

Compatible Trading Infrastructure

Panda Mobile App supports integration with:

MetaTrader 4 (MT4)

MetaTrader 5 (MT5)

Panda Trader

> This allows brokers already operating on MT4 or MT5 to upgrade their mobile trading experience without replacing their existing trading server.

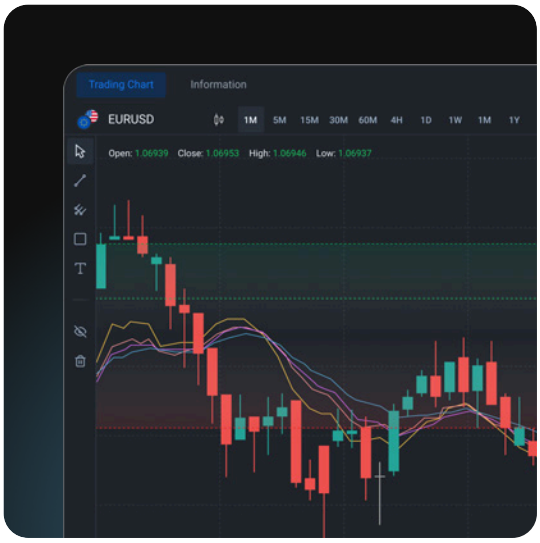

Connected Brokerage Ecosystem

The Panda Mobile App works seamlessly alongside the full Panda Trading Systems' ecosystem:

Panda CRM & Client Area

Allow traders to move between the client portal and trading environment through one connected user experience.

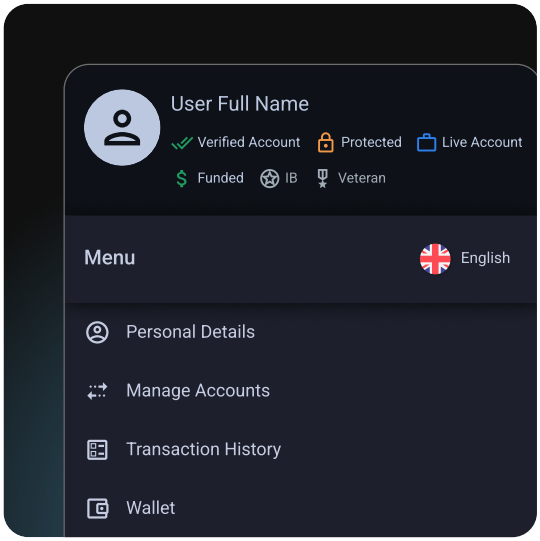

Panda WebTrader

Deliver synchronized multi-device trading between web and mobile platforms.

COOMA Social Trading

Enable mobile access to copy trading and community-based trading experiences.

Operational Infrastructure

Integrate directly with brokerage operations, compliance workflows, and account management systems.

Do You Need a Panda Mobile App?

Panda Mobile App is ideal for brokers who want to:

- Improve client retention through modern mobile experiences
- Launch branded native trading applications
- Increase trading accessibility and engagement
- Deliver multi-device trading environments
- Modernize outdated mobile trading solutions
- Provide a seamless user experience connected to their brokerage ecosystem

Frequently Asked Questions
