Panda PAMM / MAM System

Professional Allocation Management Built for Brokers.

Flexible PAMM and MAM infrastructure designed to support money managers, professional traders and managed account operations within regulated brokerage environments.

About Panda Trading Systems

Nearly Two Decades of Brokerage Technology Innovation

Since 2006, Panda Trading Systems has been building brokerage technology designed specifically for forex and CFD brokers. From a startup in Haifa to a global brokerage technology provider, PandaTS has continuously evolved its infrastructure to support regulated brokers operating in highly competitive environments.

Today, PandaTS provides a complete brokerage ecosystem that includes CRM infrastructure, Client Area, WebTrader, mobile applications, trading server infrastructure, social trading, IB management, risk management tools, and operational automation systems.

Built around scalability, automation, and operational efficiency, PandaTS solutions help brokers centralize operations, improve client experience, and manage brokerage activities from one connected environment.

What is Panda PAMM / MAM System?

Panda PAMM / MAM System is a multi-account investment management infrastructure designed to help brokers support professional money managers, portfolio allocation models, and managed trading services directly inside their brokerage environment.

The system allows master accounts to execute trades across multiple investor accounts simultaneously while maintaining flexible allocation logic, real-time synchronization, and centralized operational control.

The infrastructure supports:

- PAMM (Percentage Allocation Management Module)
- MAM (Multi-Account Manager) environments
- Real-time trade allocation across multiple accounts
- Flexible allocation models and equity distribution
- Performance monitoring and reporting
- Investor and manager account segregation
- Automated fee calculation and management

> Unlike standalone allocation plugins with limited flexibility, PandaTS' solution integrates directly into the broader brokerage ecosystem, creating a connected investment management environment.

Main Features

Panda PAMM / MAM System provides brokers, portfolio managers, and professional traders with advanced account allocation tools designed for scalable investment operations.

Real-Time Trade Allocation

Distribute trades instantly across multiple investor accounts from a centralized master account.

Automated Performance Fees

Configure management fees, performance fees, and allocation structures automatically inside the platform.

Multiple Allocation Methods

Support various allocation models including balance-based, equity-based, lot-based, and percentage allocation strategies.

Multi-Account Monitoring

Track account activity, exposure, performance, and allocations from one centralized environment.

Risk Management Controls

Apply operational safeguards, exposure limitations, and allocation restrictions directly within the management infrastructure.

Reporting & Transparency

Provide investors and managers with detailed account performance, trade history, and operational reporting.

Compatible Trading Infrastructure

Supports integration with MT4, MT5, and Panda Trader environments.

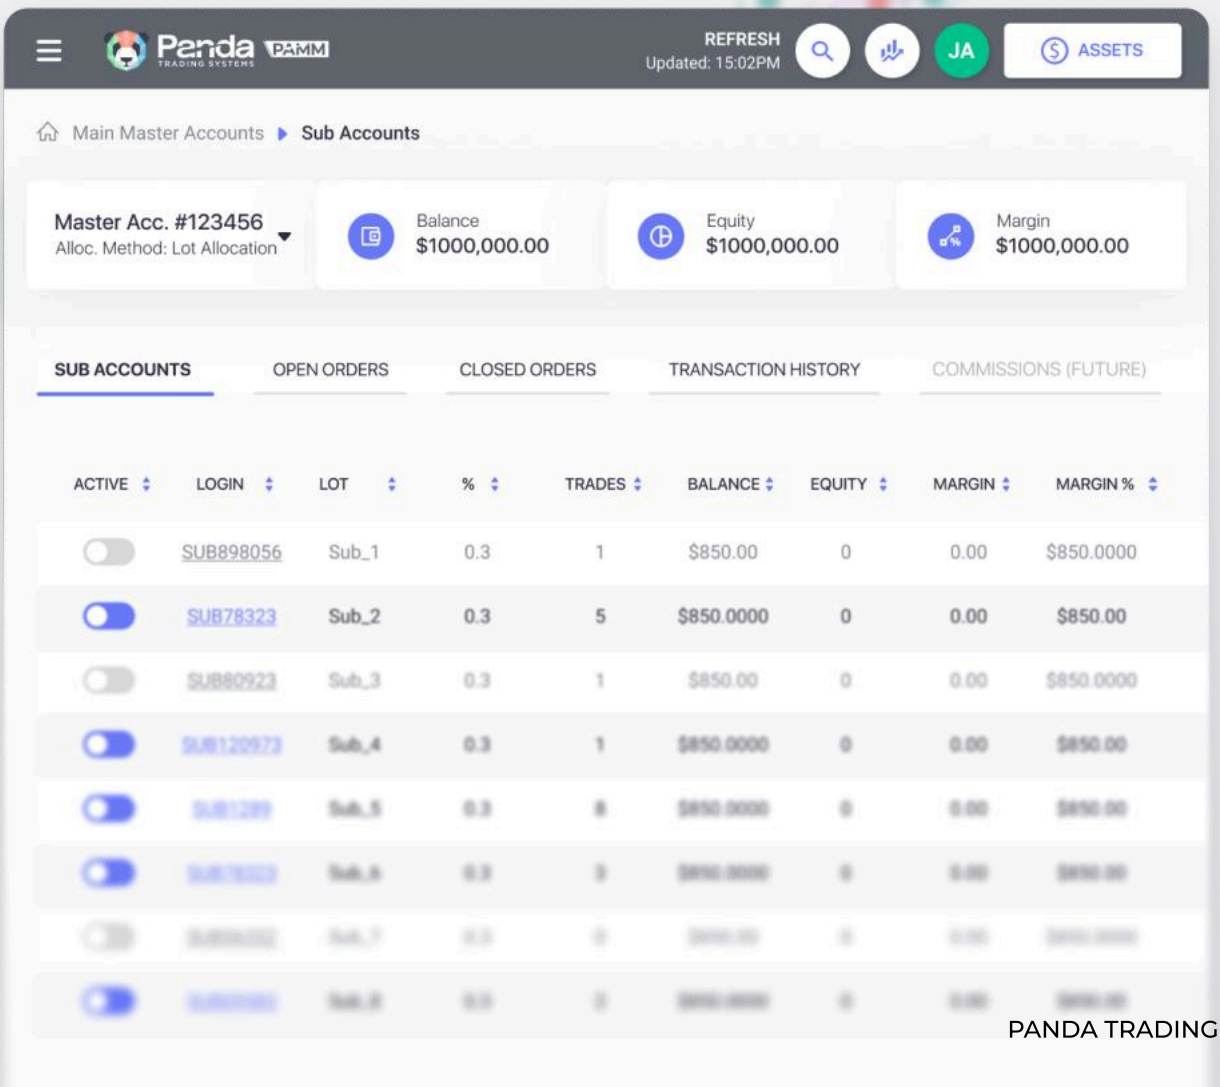

Manager & Investor Segregation

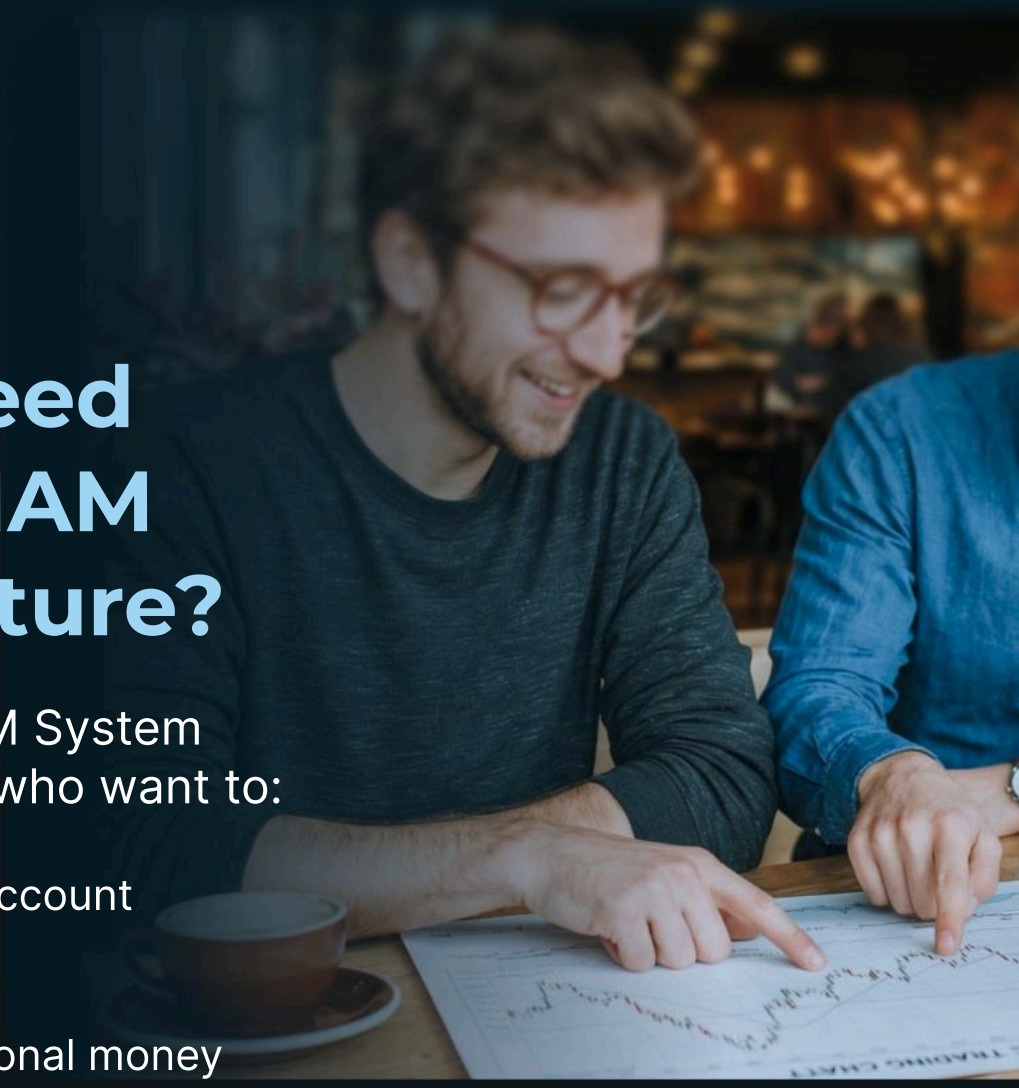

Maintain clear operational separation between money managers and investor accounts with transparent reporting infrastructure.

How It Works

Panda PAMM / MAM System operates as the investment management layer inside your brokerage infrastructure, allowing brokers to support managed trading services while maintaining centralized operational control.

Deploy PAMM/MAM functionality on your MT4/MT5 servers within minutes using our lightweight plugin. No server modifications, database changes or special user permissions are required — simply install the plugin, configure master and sub-accounts through the intuitive web interface and start managing multiple client portfolios immediately.

Do You Need PAMM / MAM Infrastructure?

Panda PAMM / MAM System is ideal for brokers who want to:

- Offer managed account services
- Support professional money managers
- Expand investment product offerings
- Increase client retention through managed trading solutions
- Create scalable investment management environments
- Maintain operational control over allocation activity

Frequently Asked Questions

DO I NEED TO INSTALL A PLUGIN ON MY TRADING SERVERS TO RUN YOUR PAMM/MAM SYSTEM?

Yes, the PAMM/MAM system includes a plugin to be added to your trading servers and a straightforward web interface to manage allocation.

DO I NEED TO SET UP SPECIAL READ-ONLY GROUPS FOR THE SUB-TRADING ACCOUNTS?

Compared to systems which impose restrictions and complex setups, our PAMM/MAM system doesn't require special read-only groups or configurations by default.

IS THERE A MAXIMUM NUMBER OF MASTERS WHICH CAN BE ADDED TO THE PAMM/MAM?

No, we don't restrict the number of masters which can be added to the PAMM/MAM system.

ARE THE PAMM/MAM TRADES SYNCHRONISED ACROSS THE TRADING PLATFORMS?

Yes, trades are synchronised live across all of the trading platforms.

DO YOUR ALLOCATION METHODS MIRROR THE TRADES OF THE MASTER ON THEIR SUB-ACCOUNT?

When a master opens a trade using the percentage allocation on Equity or fixed allocation, that trade is reflected on the sub-accounts.

Explore Panda Ecosystem

One Platform. Every Solution.

Beyond PAMM/MAM solutions, Panda Trading Systems provides the surrounding infrastructure brokers need to operate efficiently — including CRM systems, WebTrader environments, social trading infrastructure, IB management, and brokerage automation tools.

Additional Products

Panda Trader
Dedicated cloud-based trading server infrastructure built for brokerage operations.

Panda CRM
Brokerage-native CRM infrastructure covering onboarding, compliance, retention, funding, reporting, and operational automation.

Panda WebTrader
Fully branded browser-based trading platform designed for modern multi-device trading experiences.

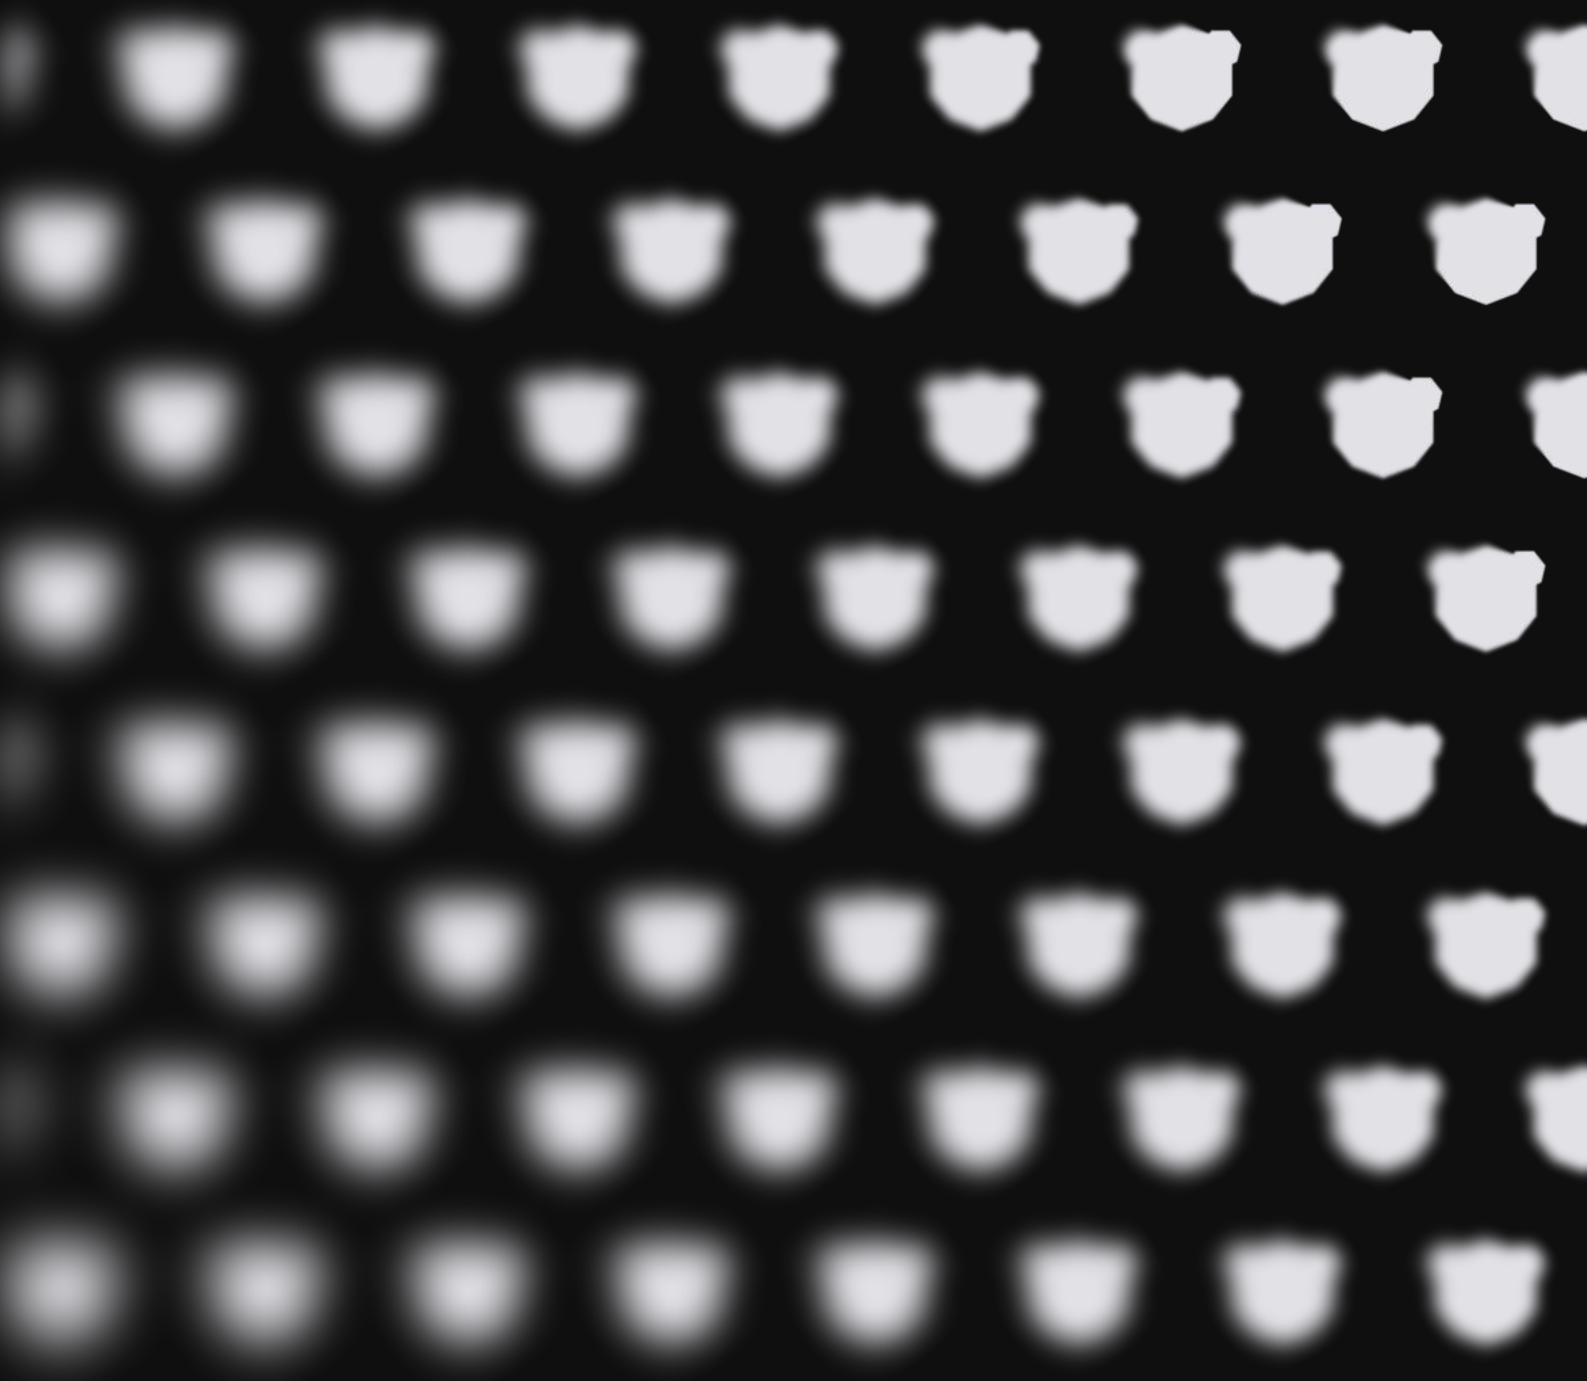

Mobile Applications
Native iOS and Android brokerage applications connected directly to trading infrastructure.

COOMA Social Trading
Social trading ecosystem allowing brokers to offer copy trading and community-based investing experiences.

Panda Quote Engine (PQE)
High-performance pricing infrastructure for liquidity aggregation, spread management, and real-time market data delivery.

Meta Dealing & Risk Plugins
Advanced brokerage plugins designed to optimize operational workflows, risk management, and MT4/MT5 environments.

IB & Affiliate Management
Complete partner infrastructure supporting multi-level commissions, referral tracking, and affiliate operations.

Operate your brokerage from one connected ecosystem built specifically for the operational reality of forex and CFD brokers.
