Browser-based trading platform
built for modern brokerages

Panda
TRADING SYSTEMS

Panda WebTrader

Panda WebTrader is a fully branded browser-based trading platform designed to give brokers a modern trading environment accessible from any device without requiring downloads or installations.

Panda WebTrader

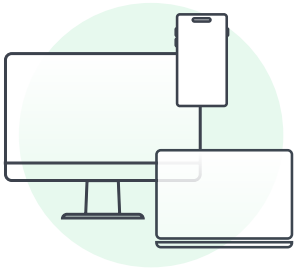

Built around accessibility, usability, and operational connectivity, Panda WebTrader allows brokers to deliver a consistent trading experience directly connected to their trading infrastructure, CRM, and client-management environment.

Brokers already operating MT4 or MT5 servers can continue using their existing infrastructure while deploying Panda WebTrader and Panda Mobile Apps as a modern frontend trading environment.

About Panda Trading Systems

Nearly Two Decades of Brokerage Technology Innovation

Since 2006, Panda Trading Systems has been building brokerage technology designed specifically for forex and CFD brokers. From a startup in Haifa to a global brokerage technology provider, PandaTS has continuously evolved its infrastructure to support regulated brokers operating in highly competitive environments.

Today, PandaTS provides a complete brokerage ecosystem that includes CRM infrastructure, Client Area, WebTrader, mobile applications, trading server infrastructure, social trading, IB management, risk management tools, and operational automation systems.

Built around scalability, automation, and operational efficiency, PandaTS solutions help brokers centralize operations, improve client experience, and manage brokerage activities from one connected environment.

What Is Panda WebTrader?

A Trading Platform Accessible From Any Browser

Panda WebTrader is a browser-based trading platform designed to provide traders with direct access to financial markets from any desktop, laptop, tablet, or mobile device without downloading software.

The platform was built around accessibility and user experience, allowing brokers to deliver a branded trading environment connected directly to their trading infrastructure.

Unlike traditional desktop trading environments that depend on software installation and device-specific configurations, Panda WebTrader allows traders to log in and access their accounts instantly through the web.

Core Platform Features

Fully Branded Trading Environment

Deploy WebTrader under your own brokerage brand, interface, and operational environment.

Modern User Experience

Designed around accessibility, speed, and usability for modern trading audiences.

Browser-Based Accessibility

Accessible directly from any modern web browser without installations or software downloads.

Built-In Client Connectivity

Supports integration with client areas, onboarding systems, and funding environments.

MT4/MT5 Frontend Connectivity

Panda WebTrader and Mobile Apps can operate as a frontend trading environment for existing MT4 and MT5 servers, allowing brokers to modernize the trader experience without replacing their current trading infrastructure.

Multi-Device Compatibility

Compatible across desktops, laptops, tablets, and smartphones.

Built to deliver a modern trading experience

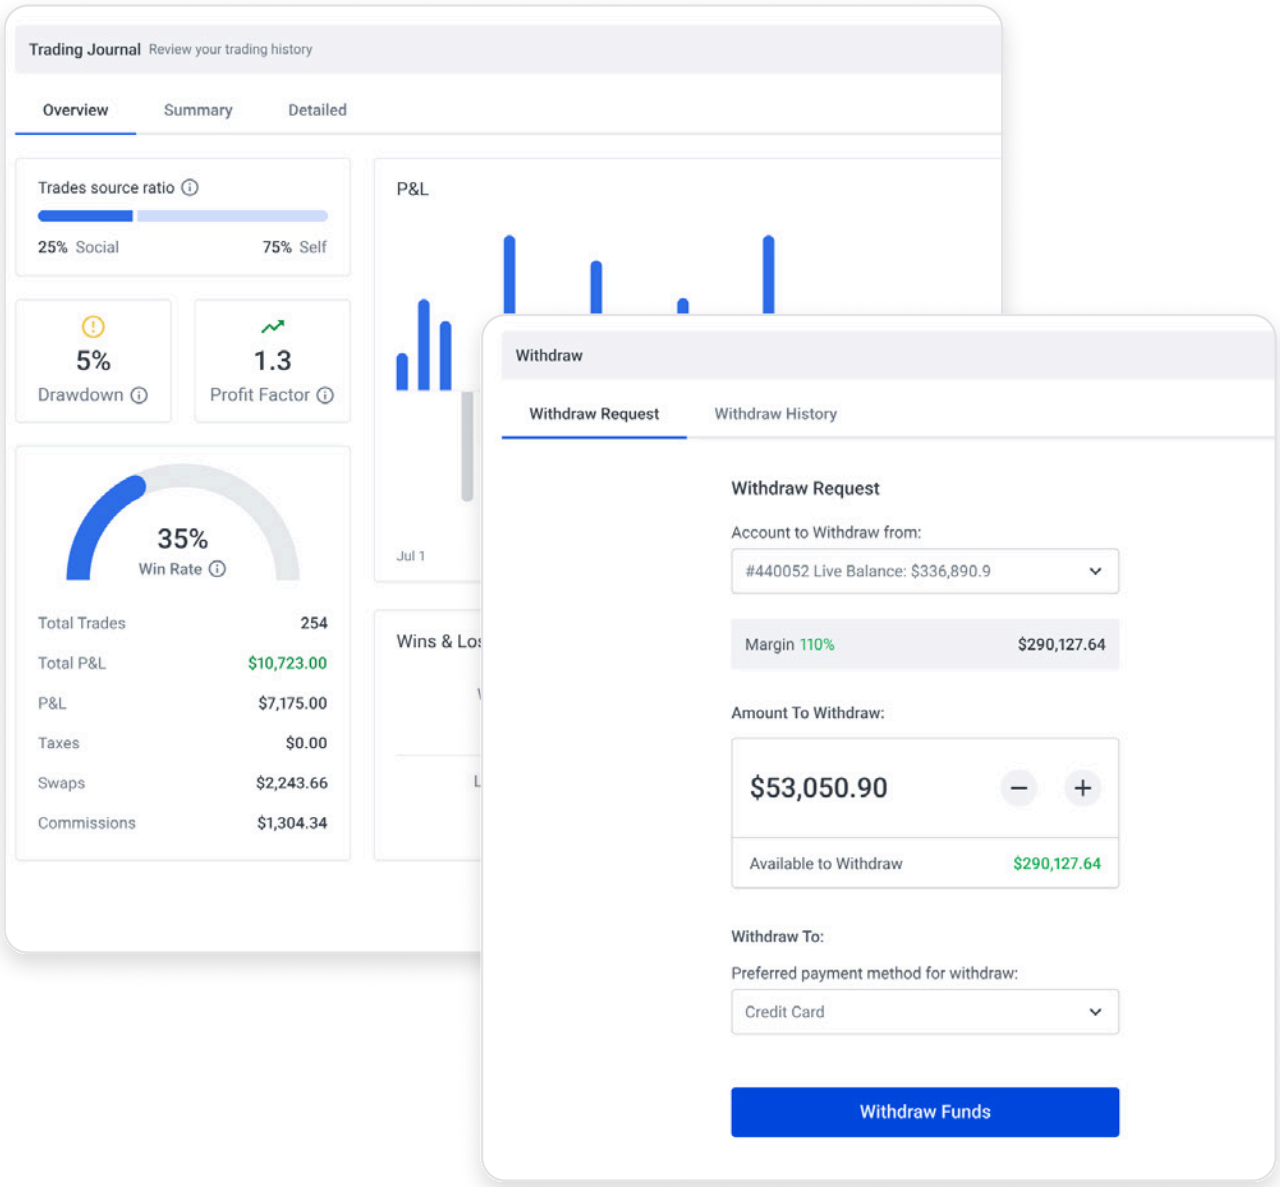

without operational complexity

Integrated Client Area

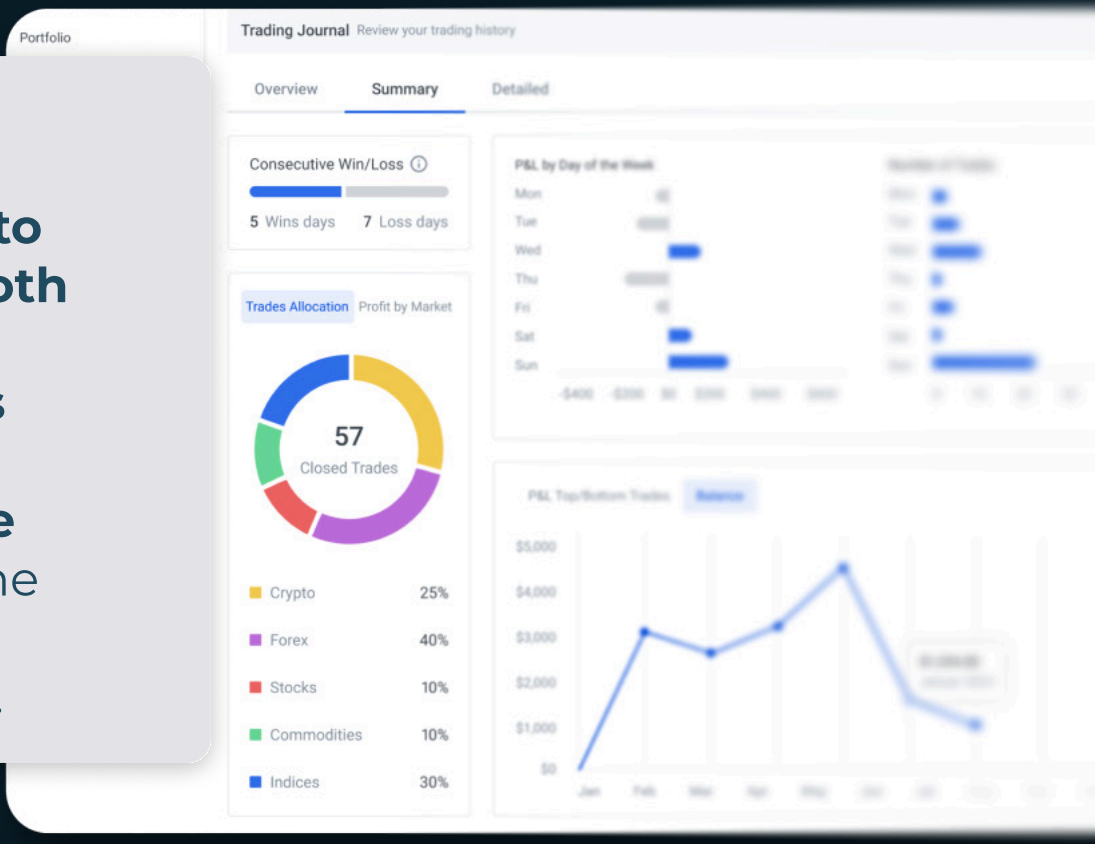

One Connected Environment for Trading & Client Operations

Panda WebTrader is fully connected to the Panda Client Area, allowing brokers to centralize onboarding, funding, support, verification, and account management within one integrated environment.

The Client Area was designed to simplify operational workflows while giving traders a smoother and more connected trading experience.

Designed to simplify both brokerage operations and trader experience through one integrated ecosystem.

Client Area Features

Multi-Server Access

Supports access across multiple servers by switching accounts directly inside the same Client Area environment.

Connected Funding Environment

Integrated deposits, withdrawals, and account-management workflows connected directly to trading infrastructure.

Direct Communication & Support

Clients can easily raise support tickets and communicate with broker teams in real time for a more efficient support experience.

Single Sign-On (SSO)

Move between client area, trading platform, and operational environments without repeated logins.

Smart KYC & eSignature

Clients can sign and submit documents directly from the Client Area, while AI-assisted verification tools help validate uploaded files instantly.

Unified Client Experience

Trading, onboarding, support, funding, and verification accessible through one connected environment.

What Brokers Can Offer With Panda WebTrader

More Than A Trading Interface

Panda WebTrader was designed to operate as part of a connected brokerage ecosystem rather than a standalone trading screen. The platform helps brokers centralize trading access while improving operational continuity between trading activity, onboarding, account management, and funding environments.

Brokerage Capabilities

Connected Client Area

Allow traders to move between onboarding, funding, and trading environments without additional logins.

Integrated Funding Experience

Allow users to access trading and funding workflows from one connected environment.

Works With MT4/MT5 Servers

Brokers can continue operating their existing MT4 or MT5 servers while using Panda WebTrader and Panda Mobile Apps as the client-facing trading environment.

Broker Branding Control

Customize platform appearance according to brokerage branding requirements.

Cross-Platform Trading Experience

Deliver the same trading access across desktop and mobile environments.

Simplified User Access

Reduce friction caused by downloads, installations, and device restrictions.

Frequently Asked Questions

DOES PANDA WEBTRADER REQUIRE SOFTWARE INSTALLATION?

No. Panda WebTrader operates directly through the browser without requiring downloads or installations.

DO BROKERS NEED TO REPLACE THEIR EXISTING MT4/MT5 SERVER?

No. Panda WebTrader and Panda Mobile Apps can operate as a frontend layer for existing MT4 and MT5 infrastructures, allowing brokers to modernize the trading experience while keeping their current server environment.

IS PANDA WEBTRADER AVAILABLE ON MOBILE DEVICES?

Yes. Panda WebTrader is accessible through desktop, tablet, and mobile browser environments.

WHICH TRADING SERVERS ARE SUPPORTED?

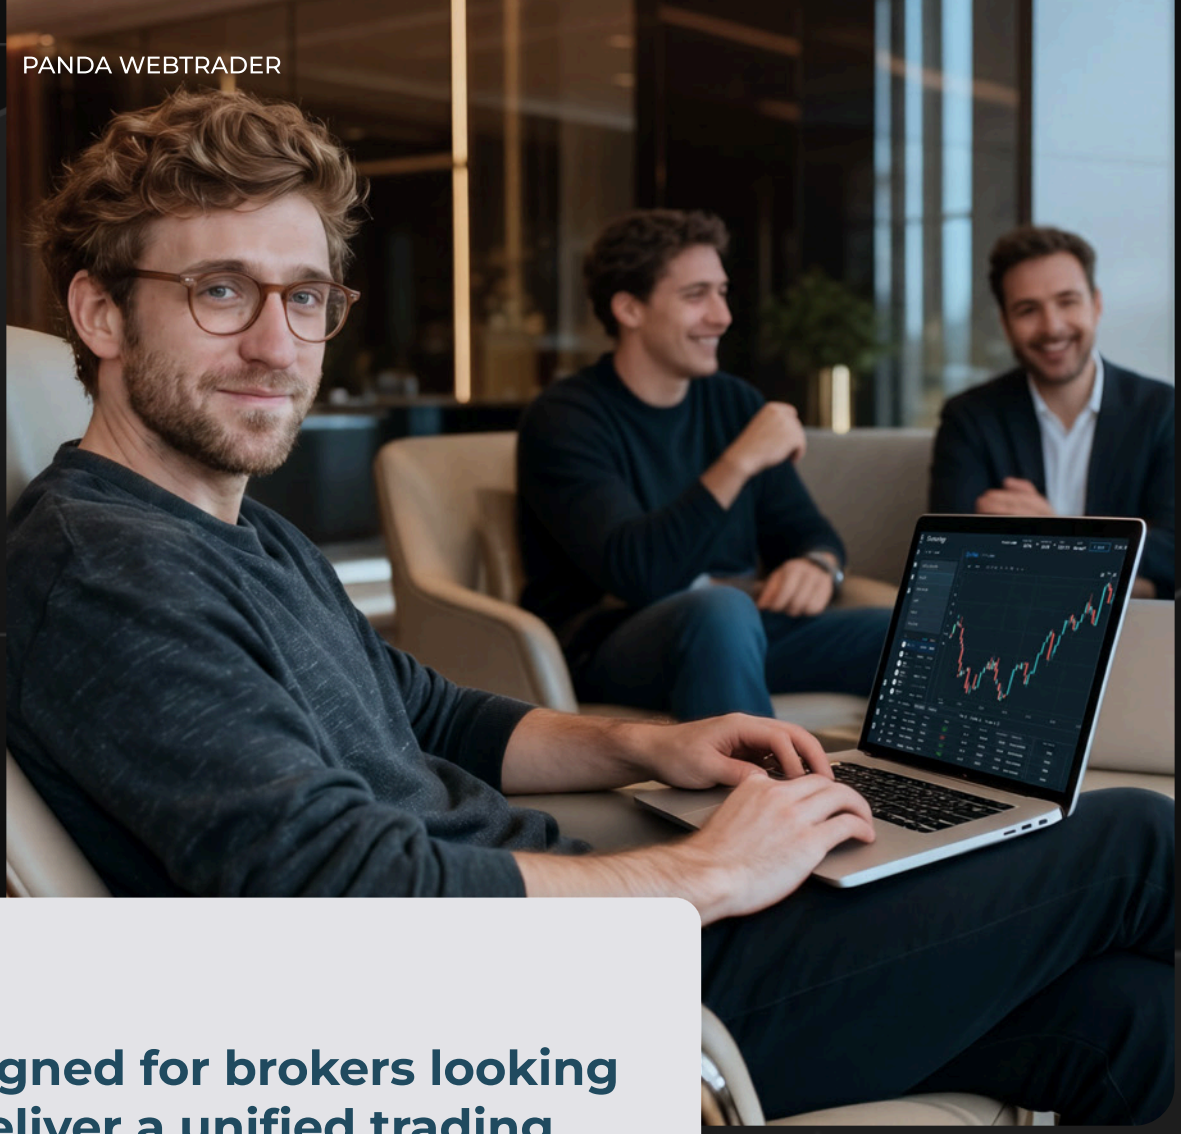

Panda WebTrader can operate with MT4, MT5, and Panda Trading Server infrastructures.

CAN WEBTRADER BE BRANDED FOR MY BROKERAGE?

Yes. Brokers can fully customize the platform according to their branding and operational requirements.

IS THE CLIENT AREA INCLUDED?

Yes. Panda WebTrader can be fully integrated with the Panda Client Area, providing onboarding, funding, KYC, support, and account management functionality within one connected environment.

Designed for brokers looking to deliver a unified trading experience across devices and operational systems.

Modern browser-based trading infrastructure designed for accessibility, operational continuity, and brokerage scalability.

Explore Panda Ecosystem

One Platform. Every Solution.

Beyond WebTrader, Panda Trading Systems provides the surrounding infrastructure brokers need to operate efficiently — including CRM systems, mobile applications, social trading infrastructure, IB management, and brokerage automation tools.
